

How can you support the UVa Cancer Center Breast Care Program?

- \$400 Will provide screening assessments including: a screening mammogram, pap smear, clinical breast exam and colorectal screening for one patient.
- \$220 Will cover the cost of one mammogram for a woman who can't afford it.
- \$125 Will allow 10 women undergoing mastectomy, the opportunity to receive a special Belisse bra to reduce swelling in the breast area and chest wall.
- \$50 Will provide a newly diagnosed patient with a care package complete with Dr. Susan Love's Breast Book, a blank writing journal, herbal tea and a few extra other "feel good" items to help the patient throughout her journey.
- \$25 Will provide a Patient Navigation Notebook to a newly diagnosed patient. The notebooks contain information on breast cancer treatment options including surgery, chemotherapy and radiation. The notebooks also provide information on coping, resources and clinical trials available at UVa.
- \$10 Will support education efforts to teenage girls about the importance of breast health, including breast self exams.
- \$5 Will provide a woman with an assessment tool to determine if she is at risk for developing breast cancer.
